

Crystal Soft

Direct flow filter with saltless ion-exchange module and carbon post-treatment.

Key Benefits:

- Efficiently removes Ca and Mg bicarbonates, preventing scale build-up on hot beverage equipment.
- Low maintenance costs - up to 30% lower than comparable models
- Flowmeter with a screen ensures timely maintenance

Delivery set:

- | | |
|---|--------|
| • Filter housing | 1 pc. |
| • Ion-exchange resin module AQUAPHOR KHC | 2 pcs. |
| • Carbon post-treatment module AQUAPHOR K2 | 1 pc. |
| • Flowmeter with a screen | 1 pc. |
| • Bypass line for mineralization regulation | ✓ |
| • Set of connection tubes | ✓ |

Permeate capacity, liters/hour	120
Total system capacity*	3000 L
Bypass line	✓
Carbon post-treatment for bypass water	✓
Dimensions (LXWXH), mm	265x90x360
Weight, kg	3,5

* Depends on the actual inlet water quality and bypass mixing ratio
